Fifteen Day Scrap Drive Necessary To Keep Bombs Going

Hobson and School Boys Will Be Around For All Scrap Iron Available

Did you ever stop to figure where all those tons of metal come from when you read about four or five hundred ton bomb loads being deposited on some of Germany's industrial centers?

Well, even on that is prepared for one of these raids must contain a certain amount of scrap metal, and this metal comes from every nook and cranny in the U. S. It is estimated, there will be needed for the current six months period 15,000,000 tons of scrap metal.

In an agricultural community there is naturally a lot of discarded metal and it is the job of someone to see that every available bit of it is gathered.

Here that job has been taken over by Prof. Hobson, who will ask the help of his larger boys in school, and the proceeds from the sale of the scrap will go to the school for books, athletic equipment and whatnot.

Last year the school received over \$400 from the scrap drive and a most of this went for books for the Library, which is one reason our school library is ranked among the high in the southeast.

Prof. Hobson is asking every one who has, or who knows where there is any scrap-iron to notify him, or one of his boys so that it may be turned in.

In case there is some heavy pieces, or some in an out of the way place report that too, for we will have the help of the U. S. Engineers and Army to get the stuff wherever it is. It is so necessary to get all scrap available that the Army will send its heavy equipment to help to get it whenever necessary.

One thing to remember, however, is that when the Army steps in we must share the proceeds of the sale with their recreation unit.
